Language – We declare the origins of the Journal by using English, German and French, as well as, a Hellenic vignette, in the cover page. However, since we recognize the dominance of USA English in technical literature, we adopted it as the Journal's language, although it is not our native language.

Focus – We consider Radio–FUNK, which still creates a vivid impression of the untouchable, and its Technology–TECH–NIK, from an Advanced–PLUS point of view. That is, we dynamically focus at any scientific-engineering discipline producing FUNKTECHNIKPLUS Théorie, Expérimentation, Métrologie, Logiciel, ou Applications.

Scope – We emphasize this scope broadness by extending the title of the Journal with a Doppelkreuz-Zeichen #, which we use as a placeholder for the disciplines of Editorial Board:
Electrical – # Electronics – # Computer – # Telecommunications
– Engineering # Computer Science # Applied Mathematics, etc.

Frequency – We regularly publish 3 issues per year on January, May, and September as well as an issue every 3 papers.

Editions – We follow the arXiv.org system, that is the 1st edition date of every issue is on the cover page and any update date is on the odd pages with its version on all pages.

Format – We use the uncommon for Journals A5 paper size and the much readable Liberation Mono fixed-space font, with hyphenation, justification, and unfixed word spacing, to display 2 pages side-by-side on widescreen monitors with WYSIWYG printout. We can consider only papers in ODF odt or MS doc format written in LibreOffice or MS Office with MathType. We use PDFCreator and PDF–Xchange to produce pdf and export to images for printing on demand and electronic publishing.

License – We use the free Open Journal System OJS from the PKP Public Knowledge Project for internet publication

Information for Peers Guiding Principles

This is a small, but independent, low profile Journal, in which we are all – Authors – Reviewers – Readers – Editors – free at last to be Peers in Knowledge, without suffering from either:

- Journal roles or positions,
- Professional, amateur, or academic statuses, or
- Established impact factorizations,

but with the following Guiding Principles:

Authors – We do know what work means; and we do respect the research work of the scientist – engineer; and we do want to highlight this work; and we do decided to found this Journal; and we do publish this work openly; and furthermore, we do care for the work of the technical author, especially the beginner one, whom we do support strongly as follows:

- 1 We encourage the author to submit his own paper written just in Basic English plus Technical Terminology.
- 2 We encourage the author even to select a pen name, which may drop it at any time to reveal his identity.
- 3 We encourage the author to submit an accepted for publication paper, which he was forced to decline that publication because it would be based on a review with unacceptable evaluation or comments.
- 4 We encourage the author to resubmit a non accepted for publication paper that was rejected after a poor, inadequate, unreasonable, irresponsible, incompetent, or ticking only, review.
- 5 We encourage the author to submit a paper that he already self-archived on some open repository, such as arXiv.org.
- 6 We encourage the author to self-archive all of the preprint and postprint versions of his paper.
- 7 We provide the author with a decent, express review process of up to just 4 weeks, by at least 2 peers, never have been co-authors with him.
- 8 We provide the author with a selection of review process between: a traditional, anonymous, peer review decision, and an immediate online pre-publication of his paper followed by an open discussion with at least 2 reviewers.

About

- 9 We immediately accept for publication a research paper directly resulting from a Project Report, Diploma-, Master-, or PhD-thesis, which the author already has successfully defended before a committee of experts and he can mention 2 members of it, who reviewed and approved his work.
- 10 We immediately publish online a paper, as soon as, it is accepted for publication in the Journal.
- 11 We quickly print-on-demand an issue every 3 papers, in excess of the 3 issues we regularly publish 3 times a year on January, May, and September.
- 12 We do not demand from the author to transfer his own copyright to us. Instead, we only consider papers resulting only from original research work, and only if the author does assure us that he owns the copyright of his paper and that he submits to the Journal either an original or a revised version of his paper, for either publication after review, or even an immediate re-publication if this paper has already been published after review, under the Creative Commons Attribution 3.0 Unported License CC-BY 3, in any case.

Reviewers – Any peer may voluntarily becomes a reviewer of the Journal in his expertize for as long as he wishes. Each author of the Journal has to support the peer-to-peer review process by reviewing one paper, written by non co-author(s) of him, for every one of his papers published in the Journal.

Readers – Any reader is a potential reviewer. We welcome online comments and post-reviews by the readers.

Editors – Any editor holds a PhD degree, to objectively prove that he really has the working experience of passing through the established publishing system. An editor pre-reviews a paper in order to check its compliance to the Guiding Principles and to select the appropriate reviewers of the Journal. We can only accept for consideration papers in the expertise areas currently shown in the Editorial Board page. However, since we are willing to amplify and extend the Scope of the Journal, we welcome the volunteer expert, in any subject included into it, who wants to join the Board, if he unreservedly accepts our Guiding Principles.
